*History of Anthropology.* Darnell, Regna

A critical reexamination of the Americanist tradition centered around the figure of Franz Boas and the professionalization of anthropology as an academic discipline in the late nineteenth and early twentieth centuries.

*Human Cultures Through the Scientific Lens.* Boyer, Pascal

This volume brings together a collection of seven articles previously published by the author, with a new introduction reframing the articles in the context of past and present questions in anthropology, psychology and human evolution.

*Anthropological Lives: an Introduction to the Profession of ...*

Dominguez, Virginia

Introduces readers to what it is like to be a professional anthropologist. It focuses on the work anthropologists do, the passions they have, the way that being an anthropologist affects the kind of life they lead.

*After Ethnos.* Rees, Tobias

What emerges from Rees's provocations is a new understanding of anthropology as a philosophically and poetically inclined, fieldwork-based investigation of what it could mean to be human when the established concepts of the human on which anthropology has been built increasingly fail us.

*Inside Ethnography.* Boeri, Miriam

Inside Ethnography shares the realities of fieldwork in action. With a focus on strategies employed with populations at society's margins, twenty-one contemporary ethnographers examine their cutting-edge work with honesty and introspection, drawing readers into the field to reveal the challenges they have faced.
