Accountants' Guidebook: A Financial and Managerial Accounting Reference. Bragg, Steven M.

"Provides a practical knowledge of how to complete many accounting tasks, while also imparting an understanding of the more critical accounting standards. The book is intended to accelerate the learning curve of the professional accountant. Topics covered include accounting procedures, GAAP for common transactions, closing the books, producing financial statements and other reports, collection tactics, payroll management, budgeting, and much more." — Publisher's website.

Financial Accounting: The Basics. Basioudis, Ilias G.

"Provides concise overviews of the key financial accounting topics supplemented by practical examples and exercises to enable readers to test their knowledge and understanding in bite-sized chunks. In empowering students to learn at their own pace, the book enhances course learning to maximize chances of overall success."

Forensic Analytics: Methods and Techniques for Forensic Accounting Investigations. Nigrini, Mark J.

"Reviews the methods and techniques that forensic accountants can use to detect intentional and unintentional errors, fraud, and biases."

Principles of Business: Accounting. Salem Press.

"Provides students and researchers with easy-to-understand entries on hundreds of important terms, principles and concepts that allow readers to develop a deeper understanding of the field."
