Geography: a Very Short Introduction. Matthews, John

This Very Short Introduction answers four basic questions: what is Geography, how do geographers work, why is Geography important, and where is the discipline of Geography heading?

Mountain Geography: Physical and Human Dimensions. Price, Martin
Mountains cover a quarter of the Earth's land surface and a quarter of the global population lives in or adjacent to these areas. The global importance of mountains is recognized particularly because they provide critical resources, such as water, food and wood; contain high levels of biological and cultural diversity; and are often places for tourism and recreation and/or of sacred significance.

Why Study Geography? Parkinson, Alan
Dominguez, Virginia

Are you considering studying geography? Wondering whether a geography degree will get you a good job, and what you might earn? Want to know what it's actually like to study geography at degree level? This book tells you what you need to know.

Mobile Mapping: Space, Cartography and the Digital. Wilmott, Clancy
This book argues for a theory of mobile mapping, a situated and spatial approach towards researching how everyday digital mobile media practices are bound up in global systems of knowledge and power.

Human Geography: a History for the 21st Century. Benko, Georges
'Human Geography' examines the major trends, debates, research and conceptual evolution of human geography during the twentieth century. Considering each of the subject's primary subfields in turn, it addresses developments in both continental European and Anglo-American geography, providing a cutting-edge evaluation of each.
